

CATALOGUE NO. 6321.0

EMBARGOED UNTIL 11.30 A.M. 19 OCTOBER 1994

## INDUSTRIAL DISPUTES, AUSTRALIA, JULY 1994

### MAIN FEATURES

#### In July 1994 -

- There were 55 disputes involving 15,700 employees and the loss of 35,600 working days.
- This represents a 109 per cent increase from the previous month in the number of employees involved, and a 25 per cent increase in the number of working days lost. The number of disputes also increased by 12 per cent from the previous month.
- The Other industries group reported 13,800 working days lost. The main contributor to working days lost in this industry group was the Wholesale and retail trade industry which reported 11,400 working days lost, an increase of 10,700 from the 700 reported in June 1994.
- The Community Services industry reported 100 working days lost, the lowest monthly total for this industry since January 1992.
- Working days lost in Victoria increased from 200 in June 1994 to 17,200 in July 1994, accounting for 48 per cent of total working days lost during July. Within this State the Wholesale and retail trade industry reported 10,600 working days lost. In the same period working days lost for New South Wales increased from 4,600 to 10,500.

#### INQUIRIES

- for further information about statistics in this publication and the availability of related unpublished statistics, contact Henry Ferst on Melbourne (03) 615 7980 or any ABS State Office.
- for information about other ABS statistics and services please contact Information Services on Melbourne (03) 615 7000 or any ABS State Office.

**DIAGRAM 2. WORKING DAYS LOST  
PER THOUSAND EMPLOYEES,  
12 MONTHS ENDED JULY 1993 AND 1994**

Source: Table 5

**In the twelve months ended July 1994 -**

- There were 531 disputes reported involving 293,800 employees and the loss of 518,000 working days. This is a 71 per cent decrease in total employees involved from the 12 months ended July 1993 and a 51 per cent decrease in the number of working days lost in the same period.
- There were 88 working days lost per thousand employees for Australia in the 12 months ended July 1994. This ranged from 27 in Tasmania to 140 in Queensland.
- Compared with the 12 months ended July 1993 working days lost per thousand employees decreased by 80 per cent in Victoria (from 449 to 92) and increased by 61 per cent in Queensland (from 87 to 140). (refer Diagram 2).
- Managerial policy was reported as the main cause of 59 per cent of all disputes. Disputes lasting for 1 day or less represented 55 per cent of all disputes. Resumption without negotiation was reported as the method of settlement for 54 per cent of all disputes.

- Working days lost in the Coal mining industry increased from 69,700 in the 12 months ended July 1993 to 171,700 in the 12 months ended July 1994 (an increase of 146 per cent). In the same period working days lost decreased by 76 per cent in the Metal products, machinery and equipment manufacturing industry (from 230,900 to 56,100). (Refer Diagram 3).

1992	726	728	871.3	871.5	941.2
1993	607	610	489.2	489.6	635.8

(a) More detailed information by State and industry is available on request. (b) Prior to September 1991 disputes affecting more than one industry and/or State were counted as separate disputes in each industry and State and in the Australian total. From that time such disputes, while still counted separately in each industry and/or State are counted just once at the broader industry and Australian level. See paragraph 5 of the Explanatory Notes. (c) Refer to paragraph 7 of Glossary. (d) Comprises employees involved in disputes which commenced during the month and additional employees involved in disputes which continued from the previous month.

(a) More detailed information by State and industry is available on request. (b) Prior to September 1991 disputes affecting more than one industry and/or State were counted as separate disputes in each industry and State and in the Australian total. From that time such disputes, while still counted separately in each industry and/or State are counted just once at the broader industry and Australian level. See paragraph 5 of the Explanatory Notes. (c) Includes disputes not elsewhere categorised.

## EXPLANATORY NOTES

### Introduction

The statistics in this publication relate to disputes which involved stoppages of work of ten working days or more at the establishments where the stoppages occurred. Ten working days is equivalent to the amount of ordinary time worked by ten people in one day, regardless of the length of the stoppage, for example, 3,000 workers on strike for 2 hours would be counted as 750 working days lost (assuming they work an 8 hour day).

2. The statistics of working days lost relate to the losses due to industrial disputes only (as defined in paragraph 2 of the Glossary). Effects on other establishments, such as stand-downs because of lack of materials, disruption of transport services, power cuts, etc. are not included.

3. The statistics of industrial disputes are compiled mainly from data obtained from employers (both private and public sector), from trade unions and from reports of government authorities. Particulars of some stoppages, e.g. State or Australia wide general strikes may have been estimated and the statistics therefore should be regarded as giving only a broad measure of the extent of industrial disputes as defined above.

### Change in methodology

4. The basis for the calculation of working days lost per thousand employees was changed in January 1987 to include estimates of employees from the Survey of Employment and Earnings. They are combined with estimates of the number of employees in agriculture and in private households, obtained from the Labour Force Survey. Estimates have been recalculated on this basis for each month back to June 1984 and are available on request. In issues of this publication prior to January 1987, the estimates of numbers of employees were based entirely on Labour Force Survey data. The effect of the change is minimal at the 'all industries' level but is quite significant, in some cases, for individual industry groups.

5. The basis for the calculation of the number of disputes was changed in the November 1992 publication and the series revised back to September 1991. Prior to September 1991, disputes affecting more than one industry and/or State were counted as a separate dispute in each industry and State and in the Australian total. From September 1991 onwards, a dispute affecting more than one industry and/or State is counted once in each industry and/or State, but only once at the broader industry and Australia level. The reason for the change was to align the method of counting the number of industrial disputes with the International Labour Office guidelines. This change does not affect the estimates of employees involved or working days lost.

### Reliability of estimates

6. Inaccuracies may occur because of imperfections in information provided by respondents or in processing by the ABS. Although considerable care is taken in questionnaire design; in the instructions given to respondents; and in editing the returns; these inaccuracies may occur in any enumeration, whether it be a full count or a sample.

### Other ABS publications

7. Users may also wish to refer to the following publications:

*Industrial Disputes, Australia* (6322.0) - issued annually

*Labour Statistics, Australia* (6101.0) - issued annually

*The Labour Force, Australia, Preliminary* (6202.0) - issued monthly

*The Labour Force, Australia* (6203.0) - issued monthly

*Trade Union Statistics, Australia* (6323.0) - issued annually

*Trade Union Members, Australia, August 1992* (6325.0)

*Employed Wage and Salary Earners, Australia* (6248.0) - issued quarterly

*Award Rates of Pay Indexes, Australia* (6312.0) - issued monthly

### Unpublished statistics

8. A range of unpublished data is also available on request including dispute details at more detailed industry levels, cross-classified by State/Territories, and finer cause of dispute and method of settlement categories than those published. Considerable time series exist for most variables. Inquiries regarding data availability and the associated charges should be directed to Henry Ferst on (03) 615 7980.

9. Current publications produced by the ABS are listed in the Catalogue of Publications and Products, Australia (1101.0). The ABS also issues, on Tuesdays and Fridays, a Publications Advice (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

### Symbols and other usages

r estimates revised since last issue  
- nil or rounded to zero

10. Where estimates have been rounded, discrepancies may occur between sums of the component items and totals.

### Electronic Services

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge, and CD ROM. For more details about our electronic data services, contact any ABS office.

### Floppy disk service

Selected ABS statistics are available on floppy disk. Further information is available on (06) 252 6684.

## GLOSSARY

**Cause of dispute**

The statistics of cause of industrial disputes relate to the reported main cause of stoppage of work and not necessarily all causes that may have been responsible for the stoppage of work. For these reasons, the statistics do not reflect the relative importance of all causes of disputes as perceived by both employers and employees. The causes are classified from information supplied by employers and according to standards determined by the International Labour Organisation. The classification of causes is as follows :

**Wages.** Claims involving general principles relating to wages e.g. increase (decrease) in wages; variation in method of payment or combined claims relating to wages, hours or conditions of work in which the claim about wages is deemed to be the most important. Combined claims in which the other claims are deemed to be the most important are included under the relevant clause. Disputes over award restructuring are included under managerial policy.

**Leave, pensions, compensation.** Claims involving general principles relating to holiday and leave provisions; pension and retirement provisions; workers' compensation provisions; insertion of penal clause provisions in awards.

**Managerial policy.** Disputes concerning the exercise of managerial control by employers, e.g. terms and conditions of employment (other than disputes specifically about wages and hours); new awards and agreements; award restructuring; work practices; principles of promotion or deployment of staff including roster complaints and retrenchments; disciplinary matters including alleged victimisation of union officials; employment of particular persons; disagreement with managerial decisions.

**Physical working conditions.** Disputes concerning physical working conditions and safety issues, e.g. protective clothing and equipment; first aid services; uncomfortable working conditions; lack of, or the condition of, amenities; claims for assistance; shortage or poor distribution of equipment or material; condition of equipment; new production methods and equipment; arduous physical tasks.

**Trade unionism.** Disputes concerning employment of non-unionists, inter-union and intra-union disputes; sympathy stoppages in support of employees in another industry; recognition of union activities.

**Hours of work.** Claims involving general principles relating to hours of work, e.g. decrease (increase) in hours; distribution of hours.

**Other.** Disputes concerning protests directed against persons or situations other than those relating to the employer/employee relationship, e.g. political matters; fining and goaling of persons; lack of work; lack of adequate transport; non-award public holidays; accidents and attendance at funerals. Stoppages for which no reason is given are also included in this category.

**Disputes**

2. For these statistics, an *industrial dispute* is defined as a withdrawal from work by a group of employees, or a refusal by an employer or a number of employers to permit some or all of their employees to work, each withdrawal or refusal being made in order to enforce a demand, to resist a demand, or to express a grievance.

3. A dispute affecting several establishments is counted as a single dispute if it is organised or directed by one person or organisation; otherwise it is counted as a separate dispute at each establishment (in each State or Territory) and in each industry in which it occurred.

4. A dispute affecting more than one industry and/or State is counted once in each industry and State but only once at the broader industry and Australia level. Prior to September 1991 disputes covering more than one industry and/or State were counted differently (refer to paragraph 5 of the Explanatory Notes for details).

5. When there is a return to work between stoppages over the same issue, and the return to work is for less than two complete months, the stoppages are counted as a single dispute. When the return to work is for two or more months, the dispute is considered to have ended at the time of the return to work. Should a subsequent stoppage occur, it is counted as a new dispute.

6. Information is recorded concerning all industrial disputes where ten or more working days are lost (see paragraph 1 of the Explanatory Notes). Included in these statistics are the following types of industrial disputes:

- unauthorised stopwork meetings;
- unofficial strikes;
- sympathetic strikes (e.g. strikes in support of a group of workers already on strike);
- political or protest strikes;
- general strikes;
- work stoppages initiated by employers (e.g. lockouts); and
- rotating or revolving strikes (i.e. strikes which occur when workers at different locations take turns to stop work).

Excluded from these statistics are work-to-rules, go-slows, bans (e.g. overtime bans) and sit-ins. In addition, industrial disputes in which employees resign are deemed to have been resolved. Statistics on those disputes will cease to be collected from the date of the employees' resignations.

**Disputes which occurred during the period**

7. *Disputes which occurred during the period* encompasses those disputes which:

- . started in a previous month or year and ended in the reference period, or
- . began and ended in the reference period, or
- . began in the reference period and continued into the next period, or
- . started prior to the reference month or year, continued through the reference period and into the next period.

### Duration of dispute

8. The *duration* of a dispute is the average number of working days lost per employee involved in the dispute. The duration of the dispute is calculated by dividing the number of working days lost in the dispute by the number of employees involved (both directly and indirectly).

### Employees

9. *Employees* refers to wage and salary earners only. Excluded are persons who are self-employed (e.g. building sub-contractors, owner-drivers of trucks) and employers.

10. *Employees directly involved* are those who actually participated in the dispute in order to enforce or resist a demand or to express a grievance.

11. *Employees indirectly involved* are those who ceased work at the establishment where the stoppages occurred, but who are not themselves parties to the dispute. Employees who ceased work at establishments other than those where the stoppages occurred are excluded (see paragraph 2 of the Explanatory Notes).

12. *Total employees involved* for any period of time are obtained by adding together the number of employees involved in each dispute in the period. For any period of time the figures may include details of the same employees involved in more than one dispute. The longer the period of reference, the more chance there is of some double counting in the number of employees involved. Where there are varying numbers of employees involved during the progress of a dispute, the figures of employees involved relate to the largest number of individual employees involved on any one day. Generally, the *total* number of employees involved for each year will equal the sum of the total number of employees involved in the first month of a year plus the number of employees *newly* involved in subsequent months. Differences between monthly and annual totals can occur due to the temporary cessation of stoppages which resume in subsequent months. Employees re-involved in this type of dispute are not classified as employees *newly* involved in stoppages in the second period in which the dispute occurs.

### Method of settlement

13. Statistics of the *method of settlement* of industrial disputes relate to the method directly

responsible for ending the stoppage of work as reported and not necessarily to the method (or methods) responsible for settling all matters in dispute. For these reasons, they do not reflect the relative importance of the work of various industrial tribunals operating under State and Federal legislation. The classification of method of settlement is as follows:

*Negotiation.* Private negotiation between the parties involved, or their representatives, without the intervention or assistance of authorities constituted under State or Federal industrial legislation.

*State legislation.* Intervention or assistance of an industrial authority or authorities created by or constituted under State conciliation and arbitration or wages board legislation, or reference to such authorities or compulsory or voluntary conference. Intervention, assistance or advice of State government officials or inspectors.

*Federal and joint Federal-State legislation.* Compulsory or voluntary conference or by intervention or assistance of, or reference to, the industrial relation commissions created by or constituted under the Industrial Relations Act, Coal Industry Acts, Stevedoring Industry Act, and other acts such as the Navigation Act; Public Service Arbitration Act. Intervention, assistance or advice of Federal government officials or inspectors.

*Resumption without negotiation.* This category may include some disputes which are settled subject to subsequent negotiation of a formal nature, such as industrial court hearings. Stop-work meetings are included, and this category may also include disputes settled by 'resumption' as stated, but about which no further information is available.

*Other methods.* Mediation; filling places of employees on strike or locked out; closing establishments permanently; dismissal or resignation of employees.

### Working days lost

14. *Working days lost* refers to working days lost by employees directly and indirectly involved in the dispute and figures are generally as reported by parties to the dispute. For some disputes working days lost are estimated on the basis of the number of employees involved and the duration of the dispute.

### Working days lost per thousand employees

15. *Working days lost per thousand employees* are calculated for the 12 month period from working days lost and estimates of employees obtained from the ABS Survey of Employment and Earnings and the ABS Labour Force Survey. Refer to paragraph 4 of the Explanatory Notes for details of the way in which these measures are calculated, and the change in the method of calculation from 1987.
